PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in C, Python, and Java, along with practical experience building web backends and embedded systems. Completed a web development internship developing authentication and student dashboard features for a University Management System, and built an autonomous Raspberry Pi line-follower robot for office assistance. Interested in applying full-stack and IoT skills to build reliable applications, learn new technologies, and strengthen problem-solving abilities.

SKILLS

- C Programming
- Python
- Java
- Basic Web Technologies
- MySQL
- Git & GitHub
- VS Code
- MS Word
- MS PowerPoint
- Raspberry Pi
- IR Sensors
- Teamwork

EXPERIENCE

Web Development Intern | Intelgic Aug 2025 – Oct 2025

Worked on a University Management System using Python Flask. Developed student dashboard and login authentication functionalities, and assisted with attendance management and database integration.

PROJECTS

RABEPILEF – Raspberry Pi Based Line Follower Robot for Office Assistance

Developed an office-assistant robot using Raspberry Pi and IR sensors for automated line following and file transportation. Implemented movement control and sensor integration using Python and IoT concepts to support office-related automation tasks.

Technologies: Python, Raspberry Pi, IoT, IR Sensors

EDUCATION

Meghnad Saha Institute of Technology, Kolkata, India | Nov 2024 – Present

Bachelor of Technology in Computer Science and Engineering

Ghani Khan Choudhury Institute of Engineering and Technology, Malda, India | Nov 2021 – Dec 2024

Diploma in Computer Science and Technology

Balurghat High School, Balurghat, India | Jan 2020 – Mar 2021

Secondary Education

LANGUAGES

English | Hindi | Bengali
